Midterm 1 Version 1 Solution

March 19, 2020

Question 1

a. $S_1 = \{aa, bb, cc, aaa, aab, aac, bba, bbb, bbc, cca, ccb, ccc, \dots\}$

Since S_2 is a set of elements with length 3,

$S_1 \cap S_2 = \{aaa, aab, aac, bba, bbb, bbc, cca, ccb, ccc\}$

b. See below

p	q	r	$\neg r$	$(p \vee q)$	$(p \vee q) \Rightarrow \neg r$
T	T	T	F	T	F
T	F	F	T	T	T
F	T	F	T	T	T
F	F	T	F	F	T
T	T	F	T	T	T
T	F	T	F	T	T
F	T	T	F	T	T
F	F	F	T	F	F

c. **Negation:** $\exists x \in \mathbb{N}, \forall y \in \mathbb{N}, \neg P(x, y) \wedge \neg Q(x, y)$.

Let $x =$ _____, and $y \in \mathbb{N}$.

We will prove that predicate P and Q are not true.

Question 2

a. $\exists x \in P,\ Student(x) \land Attends(x)$

b. $\forall x \in P,\ \exists y \in P,\ Student(y) \land Attends(y) \land Loves(x, y)$

c. $\forall x \in P,\ Student(x) \land Attends(x) \Rightarrow Loves(x, x)$

d. $\forall x_1, x_2 \in P,\ x_1 \neq x_2 \land Loves(x_1, x_2) \Rightarrow (Attends(x_1) \land \neg Attends(x_2)) \lor (\neg Attends(x_2) \land Attends(x_1))$

Correct Solution:

$\forall x_1, x_2 \in P,\ x_1 \neq x_2 \land Loves(x_1, x_2) \land Loves(x_1, x_2) \Rightarrow \neg Attends(x_1) \lor \neg Attends(x_2)$

Question 3

a. $\forall a, b, c \in \mathbb{Z},\ \exists k, l \in \mathbb{Z},\ b = ka \land c = lb \Rightarrow \exists m \in \mathbb{Z},\ c = ma$

Question 4
