

Worksheet 19 Solution

Hyungmo Gu

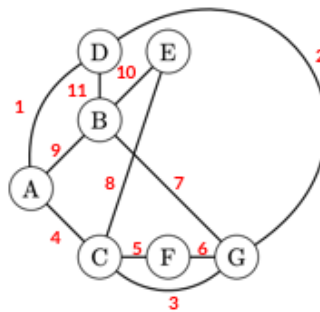

April 7, 2020

Question 1

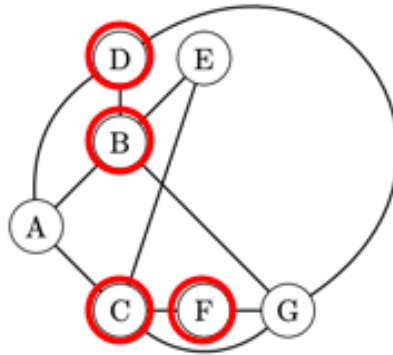

a. By the figure below, we can conclude there are 7 vertices.

b. By the figure below, we can conclude there are 11 edges.

c. By the figure below, we can conclude there are 4 vertices adjacent to G.

d. By the figure below, we can conclude the distance between A and G is 2.

There are 2 shortest paths between A and G. One is the path from A to C to G as shown above, and the other is the path from A to B to G

Correct Solution:

By the figure below, we can conclude the distance between A and G is 2.

There are 3 shortest paths between A and G. One is the path from A to C to G as shown above, and the other is the path from A to B to G

and the last one is from A to D to G

Notes:

- **Distance** is the number of edges in a shortest path.

Question 2

Question 3
