1 Exceptions

- *throw new EXCEPTION_NAME* used to raise exception
- *try* and *catch* used to handle exceptions

```
1 public class Game {
2     ...
3     public boolean applyGuess(char letter) {
4         if (misses.indexOf(letter) != -1 || hits.indexOf(letter)
5         != -1) {
6             throw new IllegalArgumentException(letter + " has
7             already been guessed"); // <- this little guy here :)
8         }
9     }
10    ...
11 }
```

```
12 }  
13
```

```
1  import java.util.Scanner;  
2  
3  public class Prompter {  
4      ...  
5      public boolean promptForGuess() {  
6          ...  
7          boolean isHit = false;  
8          try { // <- And this little guy here :)  
9              isHit = game.applyGuess(guess);  
10         } catch (IllegalArgumentException iae) {  
11             System.out.println(iae.getMessage());  
12         }  
13  
14         return isHit;  
15     }  
16 }  
17
```
