

Lab 2: Introduction to Object-Oriented Programming

Solution

2) Designing Classes

1. *Read the problem description.*
2. *Decide what classes you need to design.*

```
1     class Race:
2         pass
3
4     class Runner:
5         pass
```

3. *Sample usage.*
4. *Designing the interface.*
