

# CSC343 Worksheet 8

June 24, 2020

1. **Exercise 9.5.1:** Repeat Exercise 9.3.1, but write the code using C with CLI calls.

Notes:

- Using Call-Level Interface
  - Uses host language to connect to and access a database
  - CLI replaces embedded SQL
  - e.g.
    1. JDBC (Java)
    2. Standard SQL/CLI
    3. PHP

2. **Exercise 9.5.2:** Repeat Exercise 9.3.2, but write the code using C with CLI calls
3. **Exercise 9.6.1:** Repeat Exercise 9.3.1, but write the code using JAVA using JDBC.
4. **Exercise 9.6.2:** Repeat Exercise 9.3.2, but write the code using JAVA using JDBC.
5. **Exercise 9.7.1:** Repeat Exercise 9.3.1, but write the code using PHP.
6. **Exercise 9.7.2:** Repeat Exercise 9.3.2, but write the code using PHP.
7. **Exercise 9.7.3:** In Example 9.31 we exploited the feature of PHP that strings in double-quotes have variables expanded. How essential is this feature? Could we have done something analogous in JDBC? If so, how?
