

# SQL Basics Part 2 Notes

Team Treehouse

June 3, 2020

## 1 Tools We'll be Using

## 2 Your First SQL Statement

- SELECT

- **Syntax:** `SELECT * from TABLE_NAME;`  
    \* \* means 'all columns'

### Examples:

```
1  SELECT * FROM books;  
2  SELECT * FROM products;  
3  SELECT * FROM users;  
4  SELECT * FROM countries;  
5
```

## 3 Exercise 1

- Solution included in *exercise\_1.sql*
