

# Querying Relational Databases Part 6 Notes

Team Treehouse

June 8, 2020

## 1 What are Subqueries

- is used to return data that will be used in the main query as a condition
- is embedded within the WHERE clause
- Use cases
  - Criteria for a where clause is not specifically known
  - Need a temporary dataset to join with other tables in your database

## 2 Using IN with Subqueries to Filter Data

-
