Multiplicity in UML

Multiplicity	Option	Cardinality
0..0	0	Collection must be empty
0..1		No instances or one instance
1..1	1	Exactly one instance
0..*	*	Zero or more instance
5..5	5	Exactly 5 instances
$m..n$		At least m but no more than n instances

Example:

- Referential Integrity
 - Means that a value appearing in one context must also appear in another

Means studio can have **at most one** president
but it could not have a president at some time

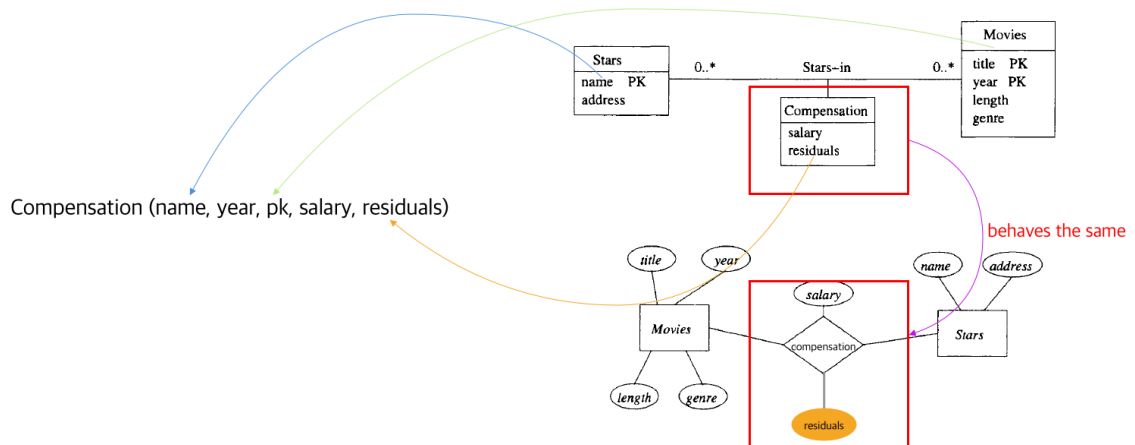

Means one studio can have **at least one** movies
and there could have many more (to infinity!)
